Just like a second breath

What **Pressodermie®** is exactly

An **innovative technique** of drainage, computerized, safe and comfortable. With successive inflation, the chambers induce a real **“wave” of pressures** all along the surface of the treated limbs. That progressive work aids **reactivation of circulation.**

The **Pressodermie®** durable effects

Producing a true **reactivation** of the circulation, our patented technique called **“Automated Double Gradient of Pressure”** means a deep drainage effect. The duration of the benefits then depends on a **saine way of living** (sports, balanced diet...)

The **Pressodermie®** time in use

30 minutes or so needed for unitary cycle in arm or leg treatment.

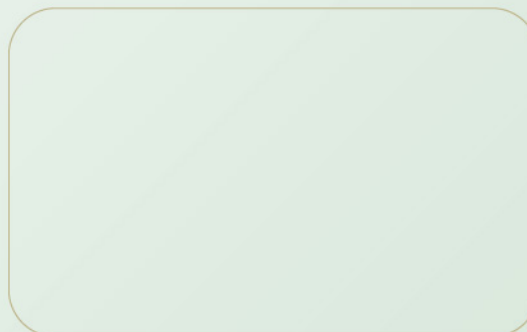

Average frequency is 2 or 3 sessions per week. From 10 to 15 sessions are required for efficient body care.

The **Pressodermie®** safety and comfort

Computerized program management and precise regulation of pressures are the assets of our system. Concrete results thru real sensation of well-being are appearing as soon as the first session of care.

The unique **Pressodermie®**...

Softness for Results

... is efficient in edemas resorption

This technique has been used in every act of medical care for many years.

*Combined with manual lymphatic drainage and types of bandages, **Pressodermie®** has become a must in treating the most severe cases of edemas and lymphedemas.*

Pressodermie® helps resorption and circulation in lymphatic vessels.

The circulatory system has then a better irrigation and functioning (venous and lymphatic networks).

... reduces sensations of heavy legs and limbs nervous matter

The stimulation of the entire circulatory system progresses in reduction and disappearing of those signs session by session.

A new sensation of a cool lightness is appearing just from the first session. Comfort and well-being come up immediately at the end of the care.

... contributes to reduction of cellulite

A cellulitis case has 3 main causes :

- reduction of blood or lymphatic circulation
- increase of organic waste
- stagnation of water cells in tissue

Pressodermie®

- stimulates blood circulation (venous)
- aids lymphatic circulation
- induces natural reactivation of elimination process

Skin and tissues are then deeply detoxified and rehabilitated. Sensation of revitalization and well-being drives patient to a good health estate.

Effects are durable on body reshaping and harmony.
